TOXICOLOGY

www.elsevier.com/locate/toxicol

Subject index of volume 210

Acetaldehyde; Cytokinesis-block micronucleus; Genetic polymorphism; Aldehyde dehydrogenase-2 (ALDH2) **210**, 169

Acetylcholinesterase; Cholinergic; Organophosphorus; Anticholinesterase; Immunoreactivity; Nutrition; Age-related **210**, 135

Ageing; Immobilization stress; Drug metabolizing enzymes; Cytochrome P450 1A; Catechol-*O*-methyltransferase; Mouse liver **210**, 189

Age-related; Cholinergic; Organophosphorus; Anticholinesterase; Acetylcholinesterase; Immunoreactivity; Nutrition **210**, 135

Aldehyde dehydrogenase-2 (ALDH2); Cytokinesis-block micronucleus; Genetic polymorphism; Acetaldehyde **210**, 169

2-Aminofluorene; Cytochrome P450; Arylamine; *p*-Phenylenediamine; Metabolic oxidation; *N*-acetylation **210**, 147

Antiandrogenic activity; Antiestrogenic activity; Estrogenic activity; Human estrogen receptor α; Human estrogen receptor β; Phthalate **210**, 223

Anticholinesterase; Cholinergic; Organophosphorus; Acetylcholinesterase; Immunoreactivity; Nutrition; Age-related **210**, 135

Antiestrogenic activity; Antiandrogenic activity; Estrogenic activity; Human estrogen receptor α; Human estrogen receptor β; Phthalate **210**, 223

Antioxidant enzymes; Arsenic; Oxidative stress; Brain regions; DL-α-Lipoic acid **210**, 25

Apoptosis; Mercuric chloride; Ultrastructure; Nephrotoxicity; OK cells **210**, 111

Apoptosis; MOLT-4; IM-9; Flow cytometry; Cytotoxicity; T-2 toxin **210**, 81

δ-Aminolevulinic acid dehydratase; Bioindicators; Biomarkers; *Biomphalaria glabrata*; Pb; *Lumbriculus variegatus* **210**, 45

Arsenic; Oxidative stress; Antioxidant enzymes; Brain regions; DL-α-Lipoic acid **210**, 25

Arylamine; Cytochrome P450; *p*-Phenylenediamine; 2-Aminofluorene; Metabolic oxidation; *N*-acetylation **210**, 147

Basic fibroblast growth factor; Soman; Neurogenesis; Neural progenitors; Cytokines; Epidermal growth factor **210**, 9

β-Chlorolactic acid; Immunotoxicity; Macrophages; Lymphocytes **210**, 175

Bioindicators; δ-Aminolevulinic acid dehydratase; Biomarkers; *Biomphalaria glabrata*; Pb; *Lumbriculus variegatus* **210**, 45

Biomarkers; δ-Aminolevulinic acid dehydratase; Bioindicators; *Biomphalaria glabrata*; Pb; *Lumbriculus variegatus* **210**, 45

Biomphalaria glabrata; δ-Aminolevulinic acid dehydratase; Bioindicators; Biomarkers; Pb; *Lumbriculus variegatus* **210**, 45

Brain regions; Arsenic; Oxidative stress; Antioxidant enzymes; DL-α-Lipoic acid **210**, 25

doi:10.1016/S0300-483X(05)00160-5

Calcium channel; Vanadium; NO; Macrophages; Cytotoxicity **210**, 205

Catechol-*O*-methyltransferase; Ageing; Immobilization stress; Drug metabolizing enzymes; Cytochrome P450 1A; Mouse liver **210**, 189

^{14}C-BDE-99; Polybrominated diphenyl ethers (PBDEs); Ethoxyresorufin-*O*-dealkylase (EROD); Thyroxine; Virus; Pentoxyresorufin-*O*-dealkylase (PROD) **210**, 159

Cell death; Formaldehyde; Reactive oxygen species; DNA–protein cross-links; Semicarbazide; Oxidative stress **210**, 235

Cholinergic; Organophosphorus; Anticholinesterase; Acetylcholinesterase; Immunoreactivity; Nutrition; Age-related **210**, 135

Comet assay; Cytokines; DNA damage; Immunoglobulin; Lymphocytes; PAHs spermatozoa; TCDD; Waste incineration **210**, 65

Cyclosporine A (CsA); Nephrotoxicity; Nitric oxide (NO); Resveratrol **210**, 55

Cytochrome P450 1A; Ageing; Immobilization stress; Drug metabolizing enzymes; Catechol-*O*-methyltransferase; Mouse liver **210**, 189

Cytochrome P450; Arylamine; *p*-Phenylenediamine; 2-Aminofluorene; Metabolic oxidation; *N*-acetylation **210**, 147

Cytokines; Comet assay; DNA damage; Immunoglobulin; Lymphocytes; PAHs spermatozoa; TCDD; Waste incineration **210**, 65

Cytokines; Soman; Neurogenesis; Neural progenitors; Epidermal growth factor; Basic fibroblast growth factor **210**, 9

Cytokinesis-block micronucleus; Genetic polymorphism; Acetaldehyde; Aldehyde dehydrogenase-2 (ALDH2) **210**, 169

Cytotoxicity; Microscopy; Pentachlorophenol; Vero cells **210**, 37

Cytotoxicity; MOLT-4; IM-9; Apoptosis; Flow cytometry; T-2 toxin **210**, 81

Cytotoxicity; Vanadium; NO; Calcium channel; Macrophages **210**, 205

Defective sperm function; Lead; Neonatal period; Male reproductive dysfunction; Macrophages **210**, 247

Diethylamine; Keratinocytes; IL-1α; IL-18; 2,4-Dinitrochlorobenzene; Ethyl-*p*-aminobenzoate; Phthalic anhydride **210**, 95

Di-*n*-octyl phthalate; Mono-*n*-octyl phthalate; Mono-3-carboxypropyl phthalate; Mono-(7-carboxy-*n*-heptyl) phthalate; Mono-(7-hydroxy-*n*-octyl) phthalate; Mono-(7-oxo-*n*-octyl) phthalate; Oxidative metabolism; Phthalates **210**, 123

2,4-Dinitrochlorobenzene; Keratinocytes; IL-1α; IL-18; Diethylamine; Ethyl-*p*-aminobenzoate; Phthalic anhydride **210**, 95

DL-α-Lipoic acid; Arsenic; Oxidative stress; Antioxidant enzymes; Brain regions **210**, 25

DNA damage; Comet assay; Cytokines; Immunoglobulin; Lymphocytes; PAHs spermatozoa; TCDD; Waste incineration **210**, 65

DNA–protein cross-links; Formaldehyde; Reactive oxygen species; Cell death; Semicarbazide; Oxidative stress **210**, 235

Drug metabolizing enzymes; Ageing; Immobilization stress; Cytochrome P450 1A; Catechol-*O*-methyltransferase; Mouse liver **210**, 189

Ebselen; Organochalcogens; Intermediate filaments; Protein phosphorylation; Neuroprotection; Organotellurium **210**, 213

Epidermal growth factor; Soman; Neurogenesis; Neural progenitors; Cytokines; Basic fibroblast growth factor **210**, 9

Estrogenic activity; Antiandrogenic activity; Antiestrogenic activity; Human estrogen receptor α; Human estrogen receptor β; Phthalate **210**, 223

Ethoxyresorufin-*O*-dealkylase (EROD); ^{14}C-BDE-99; Polybrominated diphenyl ethers (PBDEs); Thyroxine; Virus; Pentoxyresorufin-*O*-dealkylase (PROD) **210**, 159

Ethyl-*p*-aminobenzoate; Keratinocytes; IL-1α; IL-18; Diethylamine; 2,4-Dinitrochlorobenzene; Phthalic anhydride **210**, 95

Flow cytometry; MOLT-4; IM-9; Apoptosis; Cytotoxicity; T-2 toxin **210**, 81

Formaldehyde; Reactive oxygen species; Cell death; DNA–protein cross-links; Semicarbazide; Oxidative stress **210**, 235

Genetic polymorphism; Cytokinesis-block micronucleus; Acetaldehyde; Aldehyde dehydrogenase-2 (ALDH2) **210**, 169

Hepatic damage; 2-Nitropropane; Organoselenium; Liver **210**, 1

Human estrogen receptor α; Antiandrogenic activity; Antiestrogenic activity; Estrogenic activity; Human estrogen receptor β; Phthalate **210**, 223

Human estrogen receptor β; Antiandrogenic activity; Antiestrogenic activity; Estrogenic activity; Human estrogen receptor α; Phthalate **210**, 223

IL-18; Keratinocytes; IL-1α; Diethylamine; 2,4-Dinitrochlorobenzene; Ethyl-*p*-aminobenzoate; Phthalic anhydride **210**, 95

IL-1α; Keratinocytes; IL-18; Diethylamine; 2,4-Dinitrochlorobenzene; Ethyl-*p*-aminobenzoate; Phthalic anhydride **210**, 95

IM-9; MOLT-4; Apoptosis; Flow cytometry; Cytotoxicity; T-2 toxin **210**, 81

Immobilization stress; Ageing; Drug metabolizing enzymes; Cytochrome P450 1A; Catechol-*O*-methyltransferase; Mouse liver **210**, 189

Immunoglobulin; Comet assay; Cytokines; DNA damage; Lymphocytes; PAHs spermatozoa; TCDD; Waste incineration **210**, 65

Immunoreactivity; Cholinergic; Organophosphorus; Anticholinesterase; Acetylcholinesterase; Nutrition; Age-related **210**, 135

Immunotoxicity; β-Chlorolactic acid; Macrophages; Lymphocytes **210**, 175

Intermediate filaments; Organochalcogens; Ebselen; Protein phosphorylation; Neuroprotection; Organotellurium **210**, 213

Keratinocytes; IL-1α; IL-18; Diethylamine; 2,4-Dinitrochlorobenzene; Ethyl-*p*-aminobenzoate; Phthalic anhydride **210**, 95

Kupffer cell; Methyl palmitate; Phagocytosis; NF-κB **210**, 197

Lead; Neonatal period; Male reproductive dysfunction; Defective sperm function; Macrophages **210**, 247

Liver; 2-Nitropropane; Organoselenium; Hepatic damage **210**, 1

Lumbriculus variegatus; δ-Aminolevulinic acid dehydratase; Bioindicators; Biomarkers; *Biomphalaria glabrata*; Pb **210**, 45

Lymphocytes; β-Chlorolactic acid; Immunotoxicity; Macrophages **210**, 175

Lymphocytes; Comet assay; Cytokines; DNA damage; Immunoglobulin; PAHs spermatozoa; TCDD; Waste incineration **210**, 65

Macrophages; β-Chlorolactic acid; Immunotoxicity; Lymphocytes **210**, 175

Macrophages; Lead; Neonatal period; Male reproductive dysfunction; Defective sperm function **210**, 247

Macrophages; Vanadium; NO; Calcium channel; Cytotoxicity **210**, 205

Male reproductive dysfunction; Lead; Neonatal period; Defective sperm function; Macrophages **210**, 247

Mercuric chloride; Apoptosis; Ultrastructure; Nephrotoxicity; OK cells **210**, 111

Metabolic oxidation; Cytochrome P450; Arylamine; *p*-Phenylenediamine; 2-Aminofluorene; *N*-acetylation **210**, 147

Methyl palmitate; Kupffer cell; Phagocytosis; NF-κB **210**, 197

Microscopy; Cytotoxicity; Pentachlorophenol; Vero cells **210**, 37

MOLT-4; IM-9; Apoptosis; Flow cytometry; Cytotoxicity; T-2 toxin **210**, 81

Mono-(7-carboxy-*n*-heptyl) phthalate; Di-*n*-octyl phthalate; Mono-*n*-octyl phthalate; Mono-3-carboxypropyl phthalate; Mono-(7-hydroxy-*n*-octyl) phthalate; Mono-(7-oxo-*n*-octyl) phthalate; Oxidative metabolism; Phthalates **210**, 123

Mono-(7-hydroxy-*n*-octyl) phthalate; Di-*n*-octyl phthalate; Mono-*n*-octyl phthalate; Mono-3-carboxypropyl phthalate; Mono-(7-carboxy-*n*-heptyl) phthalate; Mono-(7-oxo-*n*-octyl) phthalate; Oxidative metabolism; Phthalates **210**, 123

Mono-(7-oxo-*n*-octyl) phthalate; Di-*n*-octyl phthalate; Mono-*n*-octyl phthalate; Mono-3-carboxypropyl phthalate; Mono-(7-carboxy-*n*-heptyl) phthalate; Mono-(7-hydroxy-*n*-octyl) phthalate; Oxidative metabolism; Phthalates **210**, 123

Mono-3-carboxypropyl phthalate; Di-*n*-octyl phthalate; Mono-*n*-octyl phthalate; Mono-(7-carboxy-*n*-heptyl) phthalate; Mono-(7-hydroxy-*n*-octyl) phthalate; Mono-(7-oxo-*n*-octyl) phthalate; Oxidative metabolism; Phthalates **210**, 123

Mono-*n*-octyl phthalate; Di-*n*-octyl phthalate; Mono-3-carboxypropyl phthalate; Mono-(7-carboxy-*n*-heptyl) phthalate; Mono-(7-hydroxy-*n*-octyl) phthalate; Mono-(7-oxo-*n*-octyl) phthalate; Oxidative metabolism; Phthalates **210**, 123

Mouse liver; Ageing; Immobilization stress; Drug metabolizing enzymes; Cytochrome P450 1A; Catechol-*O*-methyltransferase **210**, 189

***N*-acetylation**; Cytochrome P450; Arylamine; *p*-Phenylenediamine; 2-Aminofluorene; Metabolic oxidation **210**, 147

Neonatal period; Lead; Male reproductive dysfunction; Defective sperm function; Macrophages **210**, 247

Nephrotoxicity; Cyclosporine A (CsA); Nitric oxide (NO); Resveratrol **210**, 55

Nephrotoxicity; Mercuric chloride; Apoptosis; Ultrastructure; OK cells **210**, 111

Neural progenitors; Soman; Neurogenesis; Cytokines; Epidermal growth factor; Basic fibroblast growth factor **210**, 9

Neurogenesis; Soman; Neural progenitors; Cytokines; Epidermal growth factor; Basic fibroblast growth factor **210**, 9

Neuroprotection; Organochalcogens; Ebselen; Intermediate filaments; Protein phosphorylation; Organotellurium **210**, 213

NF-κB; Kupffer cell; Methyl palmitate; Phagocytosis **210**, 197

Nitric oxide (NO); Cyclosporine A (CsA); Nephrotoxicity; Resveratrol **210**, 55

2-Nitropropane; Organoselenium; Hepatic damage; Liver **210**, 1

NO; Vanadium; Calcium channel; Macrophages; Cytotoxicity **210**, 205

Nutrition; Cholinergic; Organophosphorus; Anticholinesterase; Acetylcholinesterase; Immunoreactivity; Age-related **210**, 135

OK cells; Mercuric chloride; Apoptosis; Ultrastructure; Nephrotoxicity **210**, 111

Organochalcogens; Ebselen; Intermediate filaments; Protein phosphorylation; Neuroprotection; Organotellurium **210**, 213

Organophosphorus; Cholinergic; Anticholinesterase; Acetylcholinesterase; Immunoreactivity; Nutrition; Age-related **210**, 135

Organoselenium; 2-Nitropropane; Hepatic damage; Liver **210**, 1

Organotellurium; Organochalcogens; Ebselen; Inter mediate filaments; Protein phosphorylation; Neuroprotection **210**, 213

Oxidative metabolism; Di-*n*-octyl phthalate; Mono-*n*-octyl phthalate; Mono-3-carboxypropyl phthalate; Mono-(7-carboxy-*n*-heptyl) phthalate; Mono-(7-hydroxy-*n*-octyl) phthalate; Mono-(7-oxo-*n*-octyl) phthalate; Phthalates **210**, 123

Oxidative stress; Arsenic; Antioxidant enzymes; Brain regions; DL-α-Lipoic acid **210**, 25

Oxidative stress; Formaldehyde; Reactive oxygen species; Cell death; DNA–protein cross-links; Semicarbazide **210**, 235

***p*-Phenylenediamine**; Cytochrome P450; Arylamine; 2-Aminofluorene; Metabolic oxidation; *N*-acetylation **210**, 147

PAHs spermatozoa; Comet assay; Cytokines; DNA damage; Immunoglobulin; Lymphocytes; TCDD; Waste incineration **210**, 65

Pb; δ-Aminolevulinic acid dehydratase; Bioindicators; Biomarkers; *Biomphalaria glabrata*; *Lumbriculus variegatus* **210**, 45

Pentachlorophenol; Cytotoxicity; Microscopy; Vero cells **210**, 37

Pentoxyresorufin-*O*-dealkylase (PROD); ^{14}C-BDE-99; Polybrominated diphenyl ethers (PBDEs); Ethoxyresorufin-*O*-dealkylase (EROD); Thyroxine; Virus **210**, 159

Phagocytosis; Kupffer cell; Methyl palmitate; NF-κB **210**, 197

Phthalate; Antiandrogenic activity; Antiestrogenic activity; Estrogenic activity; Human estrogen receptor α; Human estrogen receptor β **210**, 223

Phthalates; Di-*n*-octyl phthalate; Mono-*n*-octyl phthalate; Mono-3-carboxypropyl phthalate; Mono-(7-carboxy-*n*-heptyl) phthalate; Mono-(7-hydroxy-*n*-octyl) phthalate; Mono-(7-oxo-*n*-octyl) phthalate; Oxidative metabolism **210**, 123

Phthalic anhydride; Keratinocytes; IL-1α; IL-18; Diethylamine; 2,4-Dinitrochlorobenzene; Ethyl-*p*-aminobenzoate **210**, 95

Polybrominated diphenyl ethers (PBDEs); ^{14}C-BDE-99; Ethoxyresorufin-*O*-dealkylase (EROD); Thyroxine; Virus; Pentoxyresorufin-*O*-dealkylase (PROD) **210**, 159

Protein phosphorylation; Organochalcogens; Ebselen; Intermediate filaments; Neuroprotection; Organotellurium **210**, 213

Reactive oxygen species; Formaldehyde; Cell death; DNA–protein cross-links; Semicarbazide; Oxidative stress **210**, 235

Resveratrol; Cyclosporine A (CsA); Nephrotoxicity; Nitric oxide (NO) **210**, 55

Semicarbazide; Formaldehyde; Reactive oxygen species; Cell death; DNA–protein cross-links; Oxidative stress **210**, 235

Soman; Neurogenesis; Neural progenitors; Cytokines; Epidermal growth factor; Basic fibroblast growth factor **210**, 9

T-2 toxin; MOLT-4; IM-9; Apoptosis; Flow cytometry; Cytotoxicity **210**, 81

TCDD; Comet assay; Cytokines; DNA damage; Immunoglobulin; Lymphocytes; PAHs spermatozoa; Waste incineration **210**, 65

Thyroxine; ^{14}C-BDE-99; Polybrominated diphenyl ethers (PBDEs); Ethoxyresorufin-*O*-dealkylase (EROD); Virus; Pentoxyresorufin-*O*-dealkylase (PROD) **210**, 159

Ultrastructure; Mercuric chloride; Apoptosis; Nephrotoxicity; OK cells **210**, 111

Vanadium; NO; Calcium channel; Macrophages; Cytotoxicity **210**, 205

Vero cells; Cytotoxicity; Microscopy; Pentachlorophenol **210**, 37

Virus; ^{14}C-BDE-99; Polybrominated diphenyl ethers (PBDEs); Ethoxyresorufin-*O*-dealkylase (EROD); Thyroxine; Pentoxyresorufin-*O*-dealkylase (PROD) **210**, 159

Waste incineration; Comet assay; Cytokines; DNA damage; Immunoglobulin; Lymphocytes; PAHs spermatozoa; TCDD **210**, 65
